

Koray Tutuncu

Design Engineer, Web Designer

hello@koraytutuncu.com | +90 (534) 714 0912 | Ankara, TR | koraytutuncu.com

Design engineer with hands-on experience creating responsive, user-focused websites from layout to front-end implementation. Skilled in HTML, CSS, and design systems. Strong record of translating ideas into polished, accessible web experiences quickly and collaboratively.

WORK EXPERIENCE

Independent Design Engineer

Jun. 2022 –Present

Freelance

Remote

- Delivered responsive e-commerce sites for startup clients, improving usability and visual consistency across desktop and mobile.
- Created adaptable layouts and smooth interactions using HTML, CSS, and Figma prototypes, resulting in faster client delivery cycles.
- Developed reusable design components and internal design systems that reduced project turnaround time by 25%.
- Built interactive prototypes to streamline handoff between design and development, shortening feedback loops and reducing revisions.
- Optimized accessibility and front-end performance for live sites, improving Lighthouse scores and load times.

SELECTED WORK

• One Plus Store (oneplus.dev) — Design & Front-end

Designed and implemented the front-end for a custom storefront, focusing on layout structure, motion, and responsive behavior. Extended existing systems to achieve consistent visual quality across browsers and screen sizes.

SKILLS & INTERESTS

- **Design:** Figma, Photoshop, Illustrator, Visual Design, Interaction Design, Prototyping
- **Front-end:** HTML, CSS, JavaScript (basics), Responsive Design, Design Systems
- **Tools:** VS Code, GitHub, Version Control, Cross-Browser Testing
- **Principles:** Accessibility, Performance Optimization, User Experience

EDUCATION

Self-taught through independent projects, continuous experimentation, and hands-on design-engineering work across real-world products.
